Angular.js  
Rails  
jQuery  
Node.js  
Express  
RSpec  
Jasmine  
Mocha/Chai  
AJAX  
HTTParty  
Bootstrap

### DATABASES

MongoDB  
NoSQL  
SQL  
PostgreSQL

### DEV TOOLS

Github  
Heroku  
CLI  
Sublime Text 3

## Summary

I am a junior web developer who is passionate about using technology to build applications that improve lives and leaves a positive impact in our world. I approach problems with curiosity, persistence, and resourcefulness.

## Experience

### General Assembly - SF

June-September 2015

#### Web Development Immersive

- Trained in an intensive, 480 hour, 12 week boot-camp program focused on agile development, latest technologies, and fast-paced acquisition of languages and frameworks
- Designed, implemented, and pushed to production 4 projects with an average sprint time of 5 days each with a full, live presentation at each project deadline
- Worked collaboratively or independently on assignments that built my knowledge from foundation into full-fledged production of a web application
- Enhanced and strengthened skills such as being able to independently and collaboratively solve problems, cultivate a determined work ethic, and the ability to pick up new languages / frameworks fast in order to succeed in a role as a full-time web developer

## Projects

### Justice For Us

- From wireframes, user narratives, front and back end development, I created a social media app to build authentic community through solidarity, sharing resources and revolutionary fundraising
- Responsible for all areas of development including authentication, authorization, validation, integrating persistent data, and styling.
- Used over 10 different frameworks, languages and libraries to develop

### Cinescape

- Independently built a movie review app focused on clean user experience, beautiful design to create social connection between movie lovers of all genres
- Developed on AngularJS and a Node backend
- Managed all areas of development from inception to final product presentation
- Parsed XML to JSON to return data from an external API
- Integrated multiple external APIs using front and back end technologies

### Git Around

- Collaboratively developed a web application from user narratives to production
- Developed using Ruby with a Rails backend
- Managed mailer functionality, authentication, authorization, styling, overall concept, mapbox styling and functionality

## Related Experience

### OMI Middle School

July 2014 -June 2015

#### English as a Second Language / 7th Grade English Teacher

- Led a digital literacy program by teaching basic programming and web development to students in a low-income, underserved community

### Westlake Middle School - Oakland

July 2011 -June 2013

#### English as a Second Language 6<sup>th</sup>-7<sup>th</sup>

- Designed and implemented cutting edge language acquisition curriculum using Ipad apps and web based technology
